Bhilai, Chhattisgarh - 490023, India

OBJECTIVE

Computer Science graduate aspiring for a role in Software Testing, QA, and entry-level development. Proficient in manual and automated testing methodologies, with a strong understanding of SDLC/STLC processes. Eager to contribute to ensuring high-quality software, while also leveraging design and development knowledge to provide holistic solutions. Fast learner, team-oriented, and detail-focused.

EDUCATION

- Hemchand Yadav University** August 2022 - May 2025
Bachelor of Computer Applications
Durg, India
 - GPA: 7.5/10
- National Public School** May 2022
Pre-University Education
Bhilai, India
 - Grade: 60%
- National Public School** April 2020
Secondary Education
Bhilai, India
 - Grade: 70%

PROJECTS

Lecture Reminder System Node.js, React, MongoDB, Twilio [G](#) Github

- Developed an automated system that sends lecture reminders to faculty 10 minutes before class.
- Implemented timetable mapping for multiple courses using MongoDB.
- Built backend scheduling logic for real-time notifications.
- Performed unit testing for scheduling and notification logic.

E-learning Platform Node.js, MongoDB, React, Cloudinary [G](#) Github

- Created a centralized portal for hosting university study materials across multiple courses.
- Implemented user roles (Admin/User) with upload and authentication features.
- Designed a flexible MongoDB schema to store PDFs, videos, and course metadata efficiently.
- Tested file upload, user authentication flows, and role-based access using manual and automated testing.

Auto Job Applier (Automation Tool) Node.js, Puppeteer, Selenium

- Built an automated system to apply for jobs on selected platforms using browser automation.
- Extracts job details, filters based on criteria, and auto-fills forms.
- Implemented Selenium-based testing scripts to validate form submission and data extraction.

SKILLS

- Testing & QA:** Manual Testing, Automated Testing, Selenium WebDriver, Postman, TestNG, JUnit, Bug Tracking, Test Case Design, Regression Testing, Smoke/Sanity Testing
- Programming Languages:** Java, C++, Python, JavaScript
- Web Technologies:** HTML, CSS, React (basic), Node.js (basic), REST APIs
- Databases:** MySQL, MongoDB (basic)
- Tools & Platforms:** Jira, Git, VS Code, Figma (for UI/UX understanding), Linux basics, Shell scripting basics
- CS Fundamentals:** OOPS, OS, Networking, SDLC, STLC, Agile Methodologies

CERTIFICATIONS

- C++ Programming Certification** — Organized by College September 2024
- Networking Fundamentals** — Udemy June 2024
